### Privacy statement

Personal information collected by Council is used for municipal purposes as specified in the *Local Government Act 1989*. Personal information will be held securely and used solely by Council for these purposes and/or directly related purposes. Council may disclose this information to other organisations if required or permitted by legislation.

## The Victorian Government's rate cap

Council has complied with the Victorian Government's rates cap of 2.75%. The cap applies to the average annual increase of total general rates. The rates and charges for your property may have increased or decreased by a different percentage amount for the following reasons:

- (i) the valuation of your property relative to the valuation of other properties in the municipality;
- (ii) the application of any differential rate by Council;
- (iii) the inclusion of other rates and charges not covered by the Victorian Government's rate cap e.g. waste charges and the State Fire Services Property Levy.

## Property valuations

Property valuations are undertaken annually by the Valuer General Victoria and is an assessment of the market value of a property as at 1 January each year.

Supplementary valuations are also made during the year where there has been a material change to the property such as a new building or land subdivision.

There are 3 separate valuations returned and Council may use any of these as its system of valuation for levying rates:

**Site Value (SV)** – the land value only.

**Capital Improved Value (CIV)** – the market value of the property, being the Site Value plus the value of any buildings and other improvements on the land.

**Net Annual Value (NAV)** – for residential and rural/farm properties 5% of the CIV, for commercial and industrial properties the higher of the estimated annual market rent or 5% of the CIV.

Cardinia Shire uses the CIV system of valuation to levy general rates.

## Fire Services Property Levy

This is a Victorian Government levy, collected by Councils, to fund the State's fire services. The amount payable varies depending on the property's Land Use Classification and Capital Improved Value. You have the right to apply for a waiver, deferral, or discount on the levy amount under section 27 of the Fire Services Property Levy Act 2012 for rateable land, and under section 28 for non-rateable residential land. Visit [www.sro.vic.gov.au/fire-services-property-levy](http://www.sro.vic.gov.au/fire-services-property-levy) for more information.

## Australian Valuation Property Classification Code (AVPCC)

This code is assigned to your property according to the predominant use of the land and is used to determine your property's Land Use Classification, in accordance with the Fire Services Property Levy Act 2012.

## Land Use Classification

This classification is used to calculate the Fire Services Property Levy amount payable for your property. It does not refer to the zoning of the property or how Council rates are calculated.

## Appeal, review and objection to rates and charges, differential rates, valuations and AVPCC

You can object to the valuation of your property and/or the AVPCC assigned within 60 days of the notice issue date. Section 17 of the Valuation of Land Act 1960 specifies the grounds for objection. An objection can be made in writing on the prescribed form or online at [ratingvaluationobjections.vic.gov.au](http://ratingvaluationobjections.vic.gov.au)

Under section 183 of the Local Government Act 1989 you can apply to the Victorian Civil and Administrative Tribunal (VCAT) for a review of any differential rate applied to your property within 60 days of the notice issue date.

You can appeal to the County Court for a review of any rate or charge applied to your property within 60 days of the notice issue date. Section 184 of the Local Government Act 1989 specifies the grounds for appeal.

To maintain and enhance habitat and habitat corridors for indigenous fauna.

To encourage the regeneration of native vegetation.

[VPP 42.02 Vegetation Protection Overlay](#)

The low density residential areas within the Shire support substantial areas of remnant indigenous vegetation and mature exotic species.

The maintenance and enhancement of the flora habitat is vital for the long term protection of these areas and the native fauna they support. Some of these areas contain small lots which are not protected under the native vegetation controls of Clause 52.17 resulting in areas of vegetation becoming increasingly fragmented. The remnant vegetation is important for its contribution to habitat and environmental values and processes. This vegetation

provides protection to waterways including in the reduction of siltation and contributes to habitat corridors as well as playing a role in supporting soil stability, reducing stormwater runoff, and limiting erosion and salinity.

# Due Diligence Checklist

## What you need to know before buying a residential property

Before you buy a home, you should be aware of a range of issues that may affect that property and impose restrictions or obligations on you, if you buy it. This checklist aims to help you identify whether any of these issues will affect you. The questions are a starting point only and you may need to seek professional advice to answer some of them. You can find links to organisations and web pages that can help you learn more, by visiting [consumer.vic.gov.au/duediligencechecklist](http://consumer.vic.gov.au/duediligencechecklist).

### Urban living

#### ***Moving to the inner city?***

High density areas are attractive for their entertainment and service areas, but these activities create increased traffic as well as noise and odours from businesses and people. Familiarising yourself with the character of the area will give you a balanced understanding of what to expect.

#### ***Is the property subject to an owners corporation?***

If the property is part of a subdivision with common property such as driveways or grounds, it may be subject to an owners corporation. You may be required to pay fees and follow rules that restrict what you can do on your property, such as a ban on pet ownership.

### Growth areas

#### ***Are you moving to a growth area?***

You should investigate whether you will be required to pay a growth areas infrastructure contribution.

### Flood and fire risk

#### ***Does this property experience flooding or bushfire?***

Properties are sometimes subject to the risk of fire and flooding due to their location. You should properly investigate these risks and consider their implications for land management, buildings and insurance premiums.

### Rural properties

#### ***Moving to the country?***

If you are looking at property in a rural zone, consider:

- Is the surrounding land use compatible with your lifestyle expectations? Farming can create noise or odour that may be at odds with your expectations of a rural lifestyle.

- Are you considering removing native vegetation? There are regulations which affect your ability to remove native vegetation on private property.
- Do you understand your obligations to manage weeds and pest animals?
- Can you build new dwellings?
- Does the property adjoin crown land, have a water frontage, contain a disused government road, or are there any crown licences associated with the land?

#### ***Is there any earth resource activity such as mining in the area?***

You may wish to find out more about exploration, mining and quarrying activity on or near the property and consider the issue of petroleum, geothermal and greenhouse gas sequestration permits, leases and licences, extractive industry authorisations and mineral licences.

### Soil and groundwater contamination

#### ***Has previous land use affected the soil or groundwater?***

You should consider whether past activities, including the use of adjacent land, may have caused contamination at the site and whether this may prevent you from doing certain things to or on the land in the future.

### Land boundaries

#### ***Do you know the exact boundary of the property?***

You should compare the measurements shown on the title document with actual fences and buildings on the property, to make sure the boundaries match. If you have concerns about this, you can speak to your lawyer or conveyancer, or commission a site survey to establish property boundaries.

### Planning controls

#### ***Can you change how the property is used, or***

### ***the buildings on it?***

All land is subject to a planning scheme, run by the local council. How the property is zoned and any overlays that may apply, will determine how the land can be used. This may restrict such things as whether you can build on vacant land or how you can alter or develop the land and its buildings over time.

The local council can give you advice about the planning scheme, as well as details of any other restrictions that may apply, such as design guidelines or bushfire safety design. There may also be restrictions – known as encumbrances – on the property's title, which prevent you from developing the property. You can find out about encumbrances by looking at the section 32 statement.

### ***Are there any proposed or granted planning permits?***

The local council can advise you if there are any proposed or issued planning permits for any properties close by. Significant developments in your area may change the local 'character' (predominant style of the area) and may increase noise or traffic near the property.

### **Safety**

#### ***Is the building safe to live in?***

Building laws are in place to ensure building safety. Professional building inspections can help you assess the property for electrical safety, possible illegal building work, adequate pool or spa fencing and the presence of asbestos, termites, or other potential hazards.

### **Building permits**

#### ***Have any buildings or retaining walls on the property been altered, or do you plan to alter them?***

There are laws and regulations about how buildings and retaining walls are constructed,

which you may wish to investigate to ensure any completed or proposed building work is approved. The local council may be able to give you information about any building permits issued for recent building works done to the property, and what you must do to plan new work. You can also commission a private building surveyor's assessment.

### ***Are any recent building or renovation works covered by insurance?***

Ask the vendor if there is any owner-builder insurance or builder's warranty to cover defects in the work done to the property.

### **Utilities and essential services**

#### ***Does the property have working connections for water, sewerage, electricity, gas, telephone and internet?***

Unconnected services may not be available, or may incur a fee to connect. You may also need to choose from a range of suppliers for these services. This may be particularly important in rural areas where some services are not available.

### **Buyers' rights**

#### ***Do you know your rights when buying a property?***

The contract of sale and section 32 statement contain important information about the property, so you should request to see these and read them thoroughly. Many people engage a lawyer or conveyancer to help them understand the contracts and ensure the sale goes through correctly. If you intend to hire a professional, you should consider speaking to them before you commit to the sale. There are also important rules about the way private sales and auctions are conducted. These may include a cooling-off period and specific rights associated with 'off the plan' sales. The important thing to remember is that, as the buyer, you have rights
